

UBio-Sync Access Control & XProtect Integration

Empowering Success through Seamless Integration

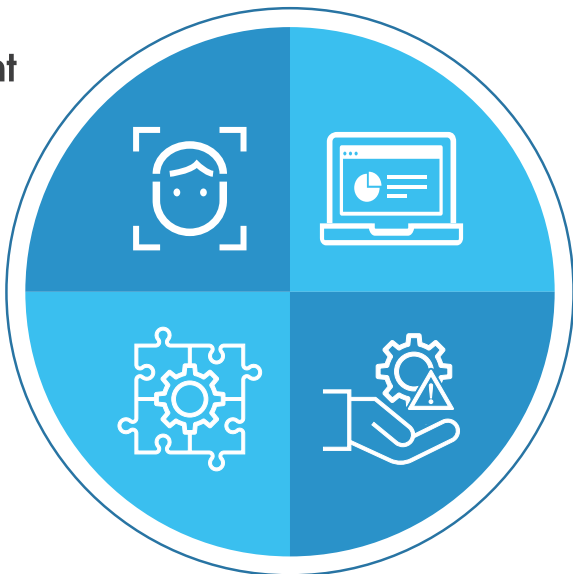

The seamless integration of UNIONCOMMUNITY's UBio-Sync Plugin which integrates UNIS, the access control system, with Milestone's XProtect allows users to effectively manage their facility.

Easy Biometric Enrollment

Facilitating user face registration via a compatible access control terminal or by uploading an image file

Seamless Integration

Reduce time and effort by offering a unified interface, minimizing the need to switch between different applications

Real-Time Event Log Management

Monitoring real-time authentication logs and access control event logs through Milestone XProtect Smart Client

Alarm Management

Access control alarms from UNIS can be effectively managed within Milestone XProtect Smart Client
